

DIGNITY BED

Design Advantages

- Provides an easy way for a bed-ridden individual to urinate and defecate independently.
- Prevents user from having to get out of bed.
- Eliminates the hassle of having to wait for assistance, which saves time and effort.
- Reduces embarrassing accidents.
- Fosters dignity and confidence.
- Easy to use.
- Disposable Bedpan

Design Features

- Rectangular bed can be produced in various sizes, including children's size.
- Features a mattress with an oval opening covered by a soft-plastic, sliding panel; opening is positioned so that it is aligned with the waist area of the average human.
- Rails are located on either side of the bed in order to prevent accidental falls.
- Panel is operated via a remote-control unit that is tethered to the side of the mattress.
- Unit features open, close, up and down buttons.
- Sliding mechanism is powered by a small electric motor that runs on a battery or an AC wall plug.
- Bed pan is located on a platform under the mattress opening; bed pan catches user's waste.
- Platform slides out from under the bed for easy removal and cleaning of the soiled bed pan; platform is activated via remote control.
- Bed is producible in home, commercial, hospital and nursing-home versions.
