

My name is Ana Rivera and I am the creator of ZeroSol2gocanopy. ZeroSol is a unique, individual sun shade canopy that converts into a beach bag. ZeroSol fits most beaches and pool chairs, is on the go. ZeroSol protects your head, your shoulders and your torso, where protection is most needed by blocking the sunlight and the harmful UV rays. Yet nearly 35,000 women, according with health reports, will be diagnosed with Melanoma, one of the deadliest forms of skin cancer here in U.S. ZeroSol is lightweight, is made out of UV resistant fabric and has convenient pockets for your towel, phone or tablet.

ZeroSol attaches with Velcro straps easily when you open the bag and places it on top of the chair's back. ZeroSol is more effective than ordinary beach umbrellas, or even existing sun shades in the market today for its portability, lightweight and, easy to attach features. ZeroSol will enhance your individual shade experience!

We are ready to license ZeroSol to our target market companies.
